

Job Title : Senior Epidemiologist
Department : SCRI Epidemiology
Business Entity : SCRI

Overview

The [Consortium for Clinical Research and Innovation, Singapore](#) (CRIS) brings together five national R&D, clinical translation and service programmes to advance clinical research and innovation for Singapore, and establish important capabilities for a future-ready healthcare system. The Business Entities under CRIS include:

- [Singapore Clinical Research Institute](#) (SCRI)
- [National Health Innovation Centre](#) (NHIC)
- [Advanced Cell Therapy and Research Institute, Singapore](#) (ACTRIS)
- [Precision Health Research, Singapore](#) (PRECISE)
- [Singapore Translational Cancer Consortium](#) (STCC)

Together, CRIS makes a positive difference to Singapore patients and researchers by ensuring that these clinical research platforms and programmes are at the cutting edge of capability development and innovation. If you are as passionate as we are in clinical trials and research, we want you!

SCRI

The Singapore Clinical Research Institute (SCRI) is the national academic research organisation dedicated to enhancing the standards of clinical research, and coordinating clinical trials. Our mission is to spearhead and develop core capabilities, infrastructure and scientific leadership for clinical research in Singapore. SCRI also works with the National Medical Research Council (NMRC) to assist the Ministry of Health (MOH) in implementing clinical trials policy and strategic initiatives to support and develop clinical research competencies locally. In driving towards its vision, SCRI collaborates with clinicians to enhance Singapore's clinical research and strengthen its expertise in executing multi-site, multi-national studies and the development of regional clinical research networks.

What you will be working on

The Role:

Primary Responsibilities and Duties

You will support collaborative clinical research by providing expert epidemiology methodology input and to contribute towards methodology training programmes. Key responsibilities will include:

- To collaborate with clinical researchers in the design, conduct, analysis and reporting of clinical research projects, primarily in non-randomized studies and systematic reviews
- To provide methodological consultation services to clinical researchers
- To mentor clinical researchers

- To conduct seminars and workshops for the training in clinical research methods
- To contribute towards the training and support role of the Singapore Branch of the Australasian Cochrane Centre
- To develop a research domain expertise
- To continuously seek to improve knowledge of epidemiologic methods
- To develop expertise in the use of relevant data analysis software
- To maintain the necessary project administration and technical documents
- To participate regularly to the Department's journal club & other meetings

What we are looking for

- Bachelor's degree in medicine, nursing, pharmacy, veterinary medicine or life sciences and a Master's degree or higher in epidemiology, public health, health services research, pharmaco-economics or biostatistics.
- Familiarity with at least one of the major statistical software packages e.g. SPSS, Stat, SAS, R. Able to effectively communicate research methodology concepts to clinical researchers.
- Possess good problem solving, communication and organizational skills
- Excellent team player and self-motivated

What you need to know

Successful candidate will be offered a 3-year renewable contract. Please send your application to career@cris.sg with the subject **Application for Senior Epidemiologist – SCRI**.
