

Job Title

Senior Biostatistician, SCRI

About SCRI

The Singapore Clinical Research Institute (SCRI) is the national academic research organisation dedicated to enhancing the standards of clinical research, and coordinating clinical trials. Our mission is to spearhead and develop core capabilities, infrastructure and scientific leadership for clinical research in Singapore. SCRI also works with the National Medical Research Council (NMRC) to assist the Ministry of Health (MOH) in implementing clinical trials policy and strategic initiatives to support and develop clinical research competencies locally. In driving towards its vision, SCRI collaborates with clinicians to enhance Singapore's clinical research and strengthen its expertise in executing multi-site, multi-national studies and the development of regional clinical research networks.

Job Description

You will be responsible for the following:

- Provide statistical support for clinical studies, including study design, sample size estimation, patient randomization, statistical analyses (using SAS), and interpretation of data and reporting of results.
- Provide statistical inputs for grant proposal, manuscript and clinical study report writing.
- Provide research consultation and mentoring to clinical researchers.
- Provide training and preparing educational material on topics related to clinical research and statistics
 - Mentoring other statisticians and statistical analysts on study design and analysis.
- Learning and implementation of new/advanced methodologies in study design and analysis

Requirements:

- Master or PhD degree in (bio)statistics.
- Competency in applying statistical thinking to solve problems in clinical research.
- Competency in communicating statistics in English to non-statisticians and appreciating the perspectives of non-statisticians.
- At least 3 years (for PhDs) and 6 years (for Masters) work experience in clinical research.
- Experience and ability to work effectively in a multi-disciplinary team environment.
- Strong methodological background in applied statistics and modeling with publication track record (preferred)

Company Overview

The Consortium for Clinical Research and Innovation Singapore (CRIS), a wholly owned subsidiary of MOH Holdings, was established in 2020 with the goal of strengthening synergies and promulgating strategies for national-level clinical research and translation programmes under the stewardship of the Singapore Ministry of Health. The former Singapore Clinical Research Institute Pte Ltd was repurposed to form CRIS which brings together five entities as business units under a common management and governance structure. These are the Singapore Clinical Research Institute (SCRI), the National Health Innovation Centre (NHIC), the Advanced Cell Therapy and Research Institute Singapore (ACTRIS), the Precision Health Research Singapore (PRECISE), and the Singapore Translational Cancer Consortium (STCC).
