

## Job Title

Assistant Manager/Manager, Business Intelligence & Development (3 year contract)

## About STCC

The Singapore Translational Cancer Consortium (STCC) aims to strengthen the overall impact of cancer research and translation in Singapore by bringing together key basic, clinical and translational teams on joint platforms to actively establish and implement collaborative cancer programmes. The consortium will be under the Ministry of Health Holdings (MOHH) Pte Ltd and anchored by the cancer research programmes and commercialization platforms of STCC's research partners (NCCS, NCIS, NUS, CSI and A\*STAR).

## Responsibilities:

- Engage with companies in the oncology related domain (encompassing therapeutics, diagnostics, next generation data technology solutions) to understand their business strategy, product/service offerings, technological needs R&D roadmap, and to forge public-private partnerships and collaborations;
- Engage with STCC's clinical and research partners (NCCS, NCIS, NUS CSI and A\*STAR), and the wider scientific/clinical community in Singapore to understand and connect their capabilities in the oncology related domain;
- Conduct business intelligence activities - assess clinical/research partnerships with industry, lead translation/commercialisation efforts; and
- Structure deals and facilitate partnerships between companies and STCC to bring in R&D investments, develop new therapeutics and diagnostics, and support economic development and improved health outcomes for Singapore.
- Account management of established partnerships - Serve as the main contact person from STCC to portfolio of established industry partners and oversee end-to-end process of account development, project negotiation and execution.
- Engage STCC's internal and external stakeholders to coordinate resources and resolve roadblocks for successful set up of collaboration projects of STCC.
- Provide oversight on contract administration for STCC stakeholders with the legal office, leading and driving STCC contractual agreements.
- Develop and support the communications strategy for effective integrated and coordinated communication between STCC stakeholders and partners, to achieve STCC's long term goals.
- The incumbent can expect a diverse and varied career, developing skills in area such as strategy and business development, marketing, intellectual property management, legal contracts, IP management, project management, leadership and a strong understanding of how to apply technology to make an impact. Officer will also learn to handle the diversity and complexity of the business, government and academic communities.
- Individuals who are keen to see technology make a difference in industry and society, especially in the area of oncology, will find a good fit with this role.

## Requirements:

- Masters or PhD Degree in Biomedical Science with specialisation in oncology; an MBA, MBBS/MD, or course in legal contracts/IP is preferable but not necessary
- 4-6 years of working experience in Healthcare and Biomedical Sciences and/or Biosciences; a background in translational clinical/research or product/business development in oncology field would be desired
- Able to appreciate and quickly understand new technologies and provide market assessment and their potential to be applied in different business context
- Effective and thoughtful communicator
- Strong organisational and administrative skills
- Resourceful and able to work with minimal supervision, independently and in a team
- Willing, adaptable and flexible to take on required/ necessary tasks beyond the job description
- A self-starter and problem solver who can pro-actively address any situation
- Able to identify and contextualise stakeholder issues and manage them appropriately

## Company Overview

The Consortium for Clinical Research and Innovation Singapore (CRIS), a wholly owned subsidiary of MOH Holdings, was established in 2020 with the goal of strengthening synergies and promulgating strategies for national-level clinical research and translation programmes under the stewardship of the Singapore Ministry of Health. The former Singapore Clinical Research Institute Pte Ltd was repurposed to form CRIS which brings together five entities as business units under a common management and governance structure. These are the Singapore Clinical Research Institute (SCRI), the National Health Innovation Centre (NHIC), the Advanced Cell Therapy and Research Institute Singapore (ACTRIS), the Precision Health Research Singapore (PRECISE), and the Singapore Translational Cancer Consortium (STCC).
