

Job Title

Health Economist (3 year contract)

The Singapore Clinical Research Institute (SCRI) has been established as a national level, clinical research organization to develop clinical research capacity as well as provide scientific leadership and collaboration for the conduct of both Investigator initiated and commercially sponsored clinical research studies in Singapore. We currently have the following opening and would like to invite you to be part of an ongoing and dynamic team:

The Role:

To support collaborative clinical research projects by providing expert methodological input and training. Your responsibilities will include:

- To collaborate with clinical researchers in the design, conduct, analysis and reporting of clinical research projects, primarily in health economic analysis alongside clinical studies and outcomes research (HEOR), as well as systematic reviews
- To provide methodological consultation to clinical researchers
- To mentor clinical researchers
- To deliver seminars and conduct workshops on clinical research methods
- To contribute towards the training and support role of Cochrane Singapore in the area of systematic reviews
- To develop a research domain expertise and interest
- To continually seek to improve knowledge of HEOR and systematic review methods
- To develop expertise in the use of relevant data analysis software
- To work effectively as a team-player within the clinical project team
- To maintain the necessary project administration and technical documents
- To participate regularly in Departmental & Institution meetings
- To be willing to share experience and knowledge with other members of the Institute

Requirements:

- Bachelor's degree in medicine, nursing, pharmacy, veterinary medicine or life sciences and a Master's degree or higher in HEOR related domains e.g. health economics or pharmacoeconomics, health technology assessment, epidemiology, public health, or health services and outcomes research.
- Familiarity with at least one of the statistical software packages e.g. SPSS, Stata, SAS, R, TreeAge. Able to effectively communicate research methodology concepts to clinical researchers.

Company Overview

The Consortium for Clinical Research and Innovation Singapore (CRIS), a wholly owned subsidiary of MOH Holdings, was established in 2020 with the goal of strengthening synergies and promulgating strategies for national-level clinical research and translation programmes under the stewardship of the Singapore Ministry of Health. The former Singapore Clinical Research Institute Pte Ltd was repurposed to form CRIS which brings together five entities as business units under a common management and governance structure. These are the Singapore Clinical Research Institute (SCRI), the National Health Innovation Centre (NHIC), the Advanced Cell Therapy and Research Institute Singapore (ACTRIS), the Precision Health Research Singapore (PRECISE), and the Singapore Translational Cancer Consortium (STCC).
