

Job Title

Project Manager, PRECISE (3 Year Contract)

About PRECISE

Precision Health Research, Singapore (PRECISE) is the central entity set up to coordinate a whole of government effort to implement Phase II of Singapore's 10-year National Precision Medicine (NPM) strategy.

PRECISE is part of the Consortium for Clinical Research and Innovation Singapore (CRIS) umbrella of research-related business entities.

About the role

You will be part of the Business Development team and be responsible for implementing and managing public-private partnerships to attract investments, develop research and enterprise capabilities and create jobs for Singapore.

Individuals who are keen to see precision medicine create opportunities for businesses and impact Singapore's healthcare and population health, and for those who can handle the diverse worlds of business, government and academic worlds, will find a good fit for this role.

Responsibilities:

- Project development
The Project Manager is expected to work with the Business Development Manager to facilitate the development of specific project agreements by arranging and participating in technical and business discussions, developing term sheets and project plans, facilitating review by participating organisations and relevant departments, and managing relevant approval processes.
- Project management
To ensure successful project execution and delivery, the Project Manager is expected to take on tasks such as budget management, project performance management and reporting, and project variations.
- Other duties
The Project Manager is expected to take on secretariat role for selected meetings and assist in other ad hoc duties assigned by PRECISE.
- Future development
The Project Manager can expect to develop knowledge in intellectual property, R&D contracts, project management, and a strong understanding of how to apply technology to make an impact. As the Singapore National Precision Medicine programme is rapidly evolving, the Project Manager may also be

Restricted, Sensitive (Normal)

offered opportunity in business development, industry intelligence, and licensing.

Requirements:

- Degree in Life Sciences or a related field; a postgraduate degree is an advantage
- At least 6 years of working experience in research programme management and/or project management in either academia or industry
- Some familiarity in contractual terminology
- Appreciation of science and technology development and innovation and willingness to learn new technical jargons
- Effective and thoughtful written and verbal communicator
- Strong organisational and administrative skills; good negotiation skills
- Able to identify and contextualise stakeholder issues, and manage them appropriately
- Willing, adaptable and flexible to take on other required/necessary tasks

Company Overview

The Consortium for Clinical Research and Innovation Singapore (CRIS), a wholly owned subsidiary of MOH Holdings, was established in 2020 with the goal of strengthening synergies and promulgating strategies for national-level clinical research and translation programmes under the stewardship of the Singapore Ministry of Health. The former Singapore Clinical Research Institute Pte Ltd was repurposed to form CRIS which brings together five entities as business units under a common management and governance structure. These are the Singapore Clinical Research Institute (SCRI), the National Health Innovation Centre (NHIC), the Advanced Cell Therapy and Research Institute Singapore (ACTRIS), the Precision Health Research Singapore (PRECISE), and the Singapore Translational Cancer Consortium (STCC).
